DETAILED ACTION

Priority

1. This application appears to be a continuation of Application No. 10/051,701 filed on January 17, 2002, now Pat. No. 6,738,109.

Claim Objections

2. Claim 10 is objected to because of the following informalities: claim 10 recites the limitation "third electrode" in line 1. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.
3. Claim 34 is objected to because of the following informalities: claim 34 recites the limitation "third electrode" in line 1. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-9, 13-22, 23-26, 28-30 and 31-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over

Art Unit: 2871

claims 1-26 of U. S. Patent No. 6,738,109. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are broader over the patented claims and the only difference between the examined claims and the patented claims is the structure of the active pattern recited in the patented claims.

Claims 10-12, 34 and 35 are also rejected since they are dependent on the rejected claims 1 and 31.
